

## **eClinicalWorks Partners with Array Networks for Data Center Scalability**

*Application delivery and acceleration solution improves customer response time for healthcare IT service provider*

**MILPITAS, CA – September 15, 2010** –[Array Networks Inc.](#), a global leader in enterprise secure application delivery, today announced that [eClinicalWorks®](#), a market leader in ambulatory clinical systems, is now using Array Networks’ AppVelocity (APV) [server load balancer](#) and [application delivery controller](#) to support its medical record and management solutions for health care providers. eClinicalWorks’ customers now benefit from increased productivity with a boost in customer response time for clinical tasks while providing secure, reliable 24x7 access for health care providers.

eClinicalWorks selected the Array APV platform to ensure a dependable solution for its cloud hosted application infrastructure. Customers are benefitting from an enhancement in medical practice productivity while reducing costs and keeping confidential patient records secure. Physicians, health centers and hospitals who are eClinicalWorks’ customers use the solution to manage patient records and maximize healthcare quality with the registry reporting and clinical support features. This cloud hosted solution also enables physicians and other medical personnel to effectively access patient records anywhere to communicate with referring physicians or share consult notes and clinical data.

“We selected Array’s solution because it enhances our software offering and allows our customers to increase productivity without sacrificing patient care or security,” said Matthew Lewis, director of I.T. for eClinicalWorks.

Array Networks’ APV application delivery controllers provide constant, SSL encrypted access to the eClinicalWorks software applications. The load balancing feature efficiently distributes web and application traffic for high availability and minimal down-time which results in reducing common query operations by 50% and decreasing server side connections by as much as fifteen times. In addition, the APV product line exceeds HIPAA and Sarbanes-Oxley Standards.

“We are pleased to work with a company that provides such an important service to the healthcare industry,” said Sunil Cherian, vice president of product marketing for Array Networks. “After thorough testing in Dell Computer’s technology lab, the APV product received certification approval by eClinicalWorks – once again demonstrating our proven track record in enterprise secure application delivery.”

### **About Array Networks**

Founded in 2000, Array Networks is a global leader in enterprise secure application delivery and universal access solutions for rapidly growing SSL VPN and application acceleration markets. More than 5000 customers worldwide – including enterprises, service providers, government and vertical organizations in healthcare, finance, insurance and education – rely on Array to provide anytime, anywhere secure and optimized access. Industry leaders including Deloitte, Gartner, Red Herring, and Frost and Sullivan have recognized Array as a market and technology leader.

### **About eClinicalWorks**

eClinicalWorks® is a privately held leader in the ambulatory clinical systems market. The company's unified electronic medical record (EMR) and practice management (PM) solutions are proven for every market segment: large practice groups, including Massachusetts eHealth Collaborative (MAeHC), Electronic Health Records of Rhode Island (EHRRI) and the New York City Department of Health and Mental Hygiene, as well as medium, small and solo practices regardless of specialty. The company enjoys high profitability with a five-year compounded growth rate of more than 100 percent year-to-year. With an established customer base of more than 40,000 providers and 120,000 healthcare professionals across all 50 states, eClinicalWorks has been awarded multiple top industry honors including being named to the Inc. 500 in 2009, 2008 and 2007. Based in Westborough, Mass., eClinicalWorks has additional offices in New York City, Pleasanton, Calif., and Alpharetta, Ga.
