

Array Networks Wins Frost and Sullivan's 'Application Delivery Controller Vendor of the Year' Award for the 3rd Consecutive Year

BANGALORE / MUMBAI, India – May 20, 2013 - Array Networks Inc., US based application delivery networking global leader, has won the prestigious 'Application Delivery Controller Vendor of the Year' award of Frost & Sullivan India ICT for the year 2013. Array Networks have been recognized with this award for the third consecutive year starting from 2011. This award reflects the outstanding performance of a company in the Information and Communications Technology (ICT) sector in India.

Frost & Sullivan award is a benchmark against the highest standards of measurement. Frost & Sullivan awards are a prestigious award that represents the best in class. Array Networks has been successfully getting this award from Frost & Sullivan's ICT from the year 2011. Array Networks is been able to achieve this because of the determination and dedication shown by the Array Networks team. Array Networks have become one of the major players in the Application Delivery Controller space.

The methodology of determining award recipients is uniform. Frost & Sullivan analysts shortlist/nominate the major contenders in each of the award category. Frost & Sullivan analyst teams conducted detailed research and assessment on market performance (such as revenue growth, market share growth, portfolio diversity, major customer acquisitions and business/market strategy) to select nominees in each category. Post which, an independent and distinguished panel of judges comprising senior executives from the industry deliberate the findings of the analyst team and decide on the deserving award recipients.

Array Networks APV Series application delivery controllers combine the cutting-edge performance and scalability. They also provide transformative features at industry-leading price points, delivering unmatched value and ROI as compared to alternative solutions. The APV series application delivery controllers address the challenges faced by enterprises and service providers in the areas of application and cloud service delivery.

Mr Shibu Paul, Country Manager – IN, ME and ASEAN at Array Networks said, *"Frost & Sullivan Awards have being the most prestigious award in the technology space. The leading vendors across various sectors compete for the most desirable titles in the ICT sector. It's a privilege and honor for Array Networks to be recognized as the Application Delivery Vendors for the third time in a row by Frost and Sullivan. We believe in providing high security networking solutions. We*

thank the Frost and Sullivan team for this award and we will continue to deliver the best of our products and solution to our customers. “
