

Note:

- f* If your network uses IPv6 addresses, go to Policy & Objects > IPv6 Policy and select Create New to add a security policy that allows users on the private network to access the Internet. If the IPv6 menu option is not available, go to System > Feature Select , turn on IPv6, and select Apply .
- f* It is recommended to avoid using any security profiles, such as antivirus or web filtering, until after you have successfully installed the FortiGate VM. After the installation is verified, you can apply any required security profiles.

The Transparent mode is now configured.

About Array Networks

Array Networks develops purpose-built systems for deploying virtual app delivery, networking and security functions with guaranteed performance. Headquartered in Silicon Valley, Array is backed by over 250 worldwide employees and is poised to capitalize on explosive growth in the areas of virtualization, cloud and software-centric computing. Proven at over 5000 worldwide customer deployments, Array is recognized by leading analysts, enterprises and service providers, for next-generation technology that delivers agility at scale.
